Awards & Recognition

One System Behind Confident Execution

RegASK transforms how global teams manage regulatory operations. Instead of manually monitoring fragmented sources, teams gain a unified platform that tracks regulatory changes across 160+ territories and turns updates into prioritized, actionable workflows. With AI-driven curation and expert validation built in, RegASK helps organizations move from reactive monitoring to coordinated, audit-ready execution.

Built for teams across:

Regulatory Affairs & Compliance Managers

Quality Assurance & Food Safety Teams

Product Development & Innovation Teams

Labelling & Packaging Teams

Sustainability & ESG Managers

Intelligent Capabilities

See Trends, Prioritize Action: Insights

Horizon Scanning and Analytics. Surface emerging risks across every market you operate in. Prioritized alerts, regulatory monitoring, and leadership-ready reports, with AI-driven curation validated by domain experts.

Get Instant Regulatory Answers 24/7: RegGenius

AI Assistant for Regulatory Q&A. Cited, audit-ready answers to your regulatory questions in seconds, with full traceability to source documents and applicable regulations across 100+ languages.

Augment Your Team: Ask RegASK

On-Demand Expert Access. Instant access to 1,800+ vetted regulatory experts across 160+ territories, for the questions that require human judgment, local knowledge, and strategic guidance.

What We Solve

Current Challenges

Hours of manual monitoring, missed updates, and compliance gaps

RegASK Solution

AI-driven regulatory monitoring with expert-validated intelligence and automated regulatory reporting

Impact and Risk assessments take weeks of manual research

Instant AI-assisted Impact & Risk assessments with trends and analytics dashboards

Fragmented workflows and siloed operations

Centralized regulatory operations with automated workflows, task management, and cross-functional collaboration

Slow responses delay launches and market expansion

Cuts manual research time by up to 80% and automatically triggers compliant actions

Scattered documentation

Regulatory Operations with centralized document management across 100+ languages

Missing audit trails increase inspection and non-compliance risk

End-to-end workflow traceability, evidence collection, and audit-ready compliance records
